

HANYANG UNIVERSITY

2019 HISS Syllabus Human Anatomy

Professor: **Zhuo Fu**
E-mail: fuzhuofz@gmail.com
Home Univ.: Virginia Tech
Dept.: Neuroscience

Description: This course is designed to meet the needs of students majoring in nursing, physician's assistant, respiratory therapy, physical therapy, occupational therapy, dental hygiene, psychology, physical education, and life sciences, or for those who want to extend their knowledge of the human body. In this course we will present the structure of the human body by subdividing it into individual body systems. The functional anatomy of each level of organization will be then studied from the microscopic level of organization to the gross (macroscopic) level. Laboratory exercises will be conducted on a computer based system. In this course, we will not only help you to memorize complicated medical and anatomical terminologies but will also focus on how to memorize them in an efficient fashion.

Objective: After completing this class students will be able to explain:

1. Human organ system gross anatomy
2. The microanatomy of body organ system
3. Anatomical & clinical vocabulary and terminology

Preparations: 1. Textbook: Course Packet Provided by Instructor
2. Other Materials: Laptop or notebook computer

Credits	3	Contact Hours	45
Schedule:	• Organization of the Human Body		
	Week 1	• Histology: Tissues • Integument	
	Week 2	• Skeletal System and the Joints
